Fruit & Herbal Waters
Flavors from the Garden

For better flavor, gently rub the herb leaves between the palms of your hands. Put herbs and fruit in the bottom of the container before adding a gallon of water. Strain or leave the crushed herbs in the container. Add fresh sprigs to each glass when serving and pour over ice if desired.

CUCUMBER COOLER
- 10 cucumber slices
- 2 lemon slices
- 3 sprigs of rosemary

MY MELONA
- 2–3 slices honeydew melon
- 1 lime, sliced

Why Should We Go Back to the Tap?

Beverage containers are bad for the environment. Fossil fuels are used for bottle production and transport.

Water is good for you! Plain water has zero calories and no added sugar.

Almost 80% of plastic water bottles end up in landfills and waterways.

Almost half of all bottled water comes from municipal tap water supplies.

Bottle water is not safer or cleaner than tap water.

If people drink local water, they are more likely to take care of the source.
